VIVEK SUVARNA

Software Developer

viveksuvarna063@gmail.com | +91 7756029366 | viveksuv.vercel.app | github.com/Viveks063

PROFESSIONAL SUMMARY

Software Developer specializing in backend systems, Android applications, and AI-driven solutions. Experienced in building scalable Spring Boot APIs, real-time applications using WebSockets, and performance-optimized Android apps with BLE integration. Solved 350+ DSA problems and built 20+ production-ready projects across web, mobile, and ML domains. Currently working on real-time IoT sensor platforms as a Software Engineering Intern.

PROFESSIONAL EXPERIENCE

Software Engineering Intern | Doori (IoT Smart Sensor Platform)

January 2026 - Present

- Developed mobile application features for real-time sensor data monitoring using Android SDK and BLE integration
- Improved app performance by 20% through efficient state management and debugging
- Implemented secure authentication and secure payments and backend connectivity using REST APIs and Firebase
- Collaborated with cross-functional teams (hardware + backend) to ensure seamless device-to-app communication

EDUCATION

B.Tech in Computer Science Engineering | Pillai College of Engineering | 2022 - 2026 | CGPA: 7.2

Class XII | Narayana Junior College | 91.6%

Class X (ICSE) | Presidency School | 83.6%

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, JavaScript, Dart

Backend: Spring Boot, Spring Security, Spring WebSocket, REST APIs, Maven

Mobile: Android SDK, BLE, Firebase, Room Database

Frontend: React, HTML, CSS, JavaScript

AI/ML: LSTM, Transformers, OpenCV, Deep Learning

Databases & Tools: PostgreSQL, Firebase, H2, Git, Pandas

KEY PROJECTS

Real-Time Chat Application | *Spring Boot, WebSocket, PostgreSQL*

- Built room-based real-time chat system supporting concurrent users with message persistence
- Implemented WebSocket-based communication for low-latency messaging

Blog API with JWT Authentication | *Spring Boot, Spring Security, PostgreSQL*

- Designed RESTful APIs with role-based access control and JWT authentication
- Implemented secure CRUD operations with input validation and error handling

Fitness Tracking App | *Android SDK, Room Database, Health APIs*

- Built Android app for comprehensive health metrics tracking with workout logging and progress visualization
- Implemented local data persistence using Room Database for offline functionality

Image Captioning with BLIP | *Python, Transformers, Deep Learning*

- Implemented transformer-based BLIP model for automatic image caption generation
- Achieved high accuracy on diverse image datasets using pre-trained models

Next Word Predictor | *Python, LSTM, TensorFlow*

- Developed LSTM-based neural network for context-aware text prediction
- Trained model on large text corpora achieving high prediction accuracy

Focus Detective Chrome Extension | *JavaScript, Chrome APIs, HTML/CSS*

- Built Chrome extension that blocks distracting websites and provides productivity insights
- Implemented time tracking and analytics dashboard to monitor browsing patterns

URL Shortener Service | *Spring Boot, REST APIs, H2 Database*

- Created secure URL shortening service with custom short codes and analytics tracking

Sleep and Step Activity tracker | *Flutter, Sensors (Accelerometer APIs), Mobile Usage Logs*

- A mobile application that monitors user sleep patterns and daily step count
- Sleep data is analyzed using mobile usage logs, while step detection is implemented using accelerometer sensor data to track real-time physical activity.

ACHIEVEMENTS

- Solved 350+ problems on LeetCode, demonstrating strong DSA fundamentals
- Built 20+ production-ready projects across mobile, web, backend, and AI/ML domains

LANGUAGES

English, Hindi, Marathi, Tulu, Kannada, Spanish
